DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

The present invention discloses several species including a recovery mechanism and a recovery operation.

I) The recovery mechanism is directed to one of the following distinct subspecies:

- Subspecies 1A: Figure 13.
- Subspecies 1B: Figure 14.
- Subspecies 1C: Figure 15.
- Subspecies 1D: Figure 16
- Subspecies 1E: Figure 17
- Subspecies 1F: Figure 18-20
- Subspecies 1G: Figure 21-23
- Subspecies 1H: Figure 24
- Subspecies 1I: Figure 25
- Subspecies 1J: Figure 26
- Subspecies 1K: Figure 27
- Subspecies 1L: Figure 28-29

II) The recovery operation is directed to one of the following distinct subspecies:

- Subspecies 2A: Figure 30
- Subspecies 2B: Figure 31
- Subspecies 2C: Figure 32
- Subspecies 2D: Figure 33
- Subspecies 2D: Figure 33
- Subspecies 2E: Figure 34

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species by selecting a single subspecies from each of Subspecies group I and II for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2853

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ly T TRAN whose telephone number is 571-272-2155. The examiner can normally be reached on M-F (7:30am-5pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Meier can be reached on 571-272-2149. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
